SUMMARY

Technology Consulting professional at EY with experience in enterprise transformation programs involving SAP S/4HANA. Background in process standardization, data migration, and change enablement, alongside hands-on experience building and shipping mobile applications. Interested in business transformation and technology strategy roles.

EXPERIENCE

Associate Consultant, EY India (Ernst & Young)   **July 2024 - Present**

- Contributed to SAP S/4HANA data migration initiatives within the Technology Consulting service line by supporting testing, validation, and automation of data upload programs, improving data reliability and process efficiency.
- Supported enterprise process standardization and optimization efforts across multiple SAP workstreams, collaborating with functional and technical stakeholders during transformation activities.
- Delivered SAP Enable Now recordings and structured documentation to strengthen end-user training, enhance process clarity, and drive smoother system adoption across project teams.

Research Intern, IIT Guwahati   **January 2024 - May 2024**

- Conducted a final-semester research project focused on improving accuracy in the Stanford Question Answering Dataset (SQuAD) using multiple Large Language Models, including Llama 3, Phi-3, and Mistral.
- Demonstrated the effectiveness of multi-model collaboration in reducing dataset errors and improving response reliability under academic supervision.

Information Systems Trainee, IOCL Digboi   **June 2022 - July 2022**

- Designed and managed a Node.js server integrated with LDAP authentication, enabling secure and efficient communication across enterprise information systems.
- Gained exposure to enterprise IT environments, access management, and system integration practices within a large public-sector organization.

EDUCATION

Bachelor of Technology in Information Technology   **June 2020 - July 2024**

Sikkim Manipal Institute of Technology

- **GPA: 9.41/10**
- Secured 3rd position (Bronze Medal) in the IT department.
- Relevant Coursework: *Database Management Systems, Object-Oriented Programming, Computer Networks, Software Engineering, Artificial Intelligence, Natural Language Processing, Web Technologies*

PRODUCT & APP PROJECTS

Moniqa - Budgeting & Personal Finance App

- Built a minimalist budgeting application designed to make expense tracking simple, private, and habit-forming. Focused on a clean, distraction-free user experience and intuitive workflows. Achieved 7,000+ organic App Store impressions shortly after launch, validating early user interest.

FocusFlux – Ambient Focus & Productivity App

- Designed, developed, and shipped a mindful focus application centered around ambient soundscapes and distraction-free work sessions. Emphasized calm UX, intentional design, and sustained focus, with features tailored to support deep work and productivity routines.

TheStoicMonk - Meditation & Mindfulness App

- Developed and published a feature-rich mindfulness application using React Native, incorporating customizable audio meditation sessions, personal journaling, Pomodoro technique integration, progress analytics, and daily Stoic philosophy content.

TECHNICAL SKILLS

- **Programming Languages:** Typescript, Javascript, Python, Swift, Golang, SQL, HTML/CSS
- **Frameworks/Libraries:** React Native, Next.js, SwiftUI, React.js, Node.js, SpaCy, NLTK
- **Developer Tools:** Git/Github, Firebase, Postman, Docker, Vim
- **ERP Tools:** SAP S/4HANA *(PP, QM, PM, Data Migration)*
- **Certifications:** Advanced Programming in Swift *(Meta - Coursera)*, NLP in Python *(Udemy)*
